

Algae and fungus remover LOBA-Ex

Highly concentrated liquid cleaning agent for the removal of algae and fungal growth from masonry, natural stone, facades and exterior surfaces. Ready for use.

Technical information	
Form:	Liquid
Density	Approx. 1.085 g/cm ³
Yield:	Approximately 100 to 200 ml/m ² depending on the type of application
Delivery form:	5-litre plastic container
Storage:	Store in the closed original container, in cool conditions. Open the container carefully, since it may be under slight pressure. Close the container immediately after use.
pH value:	12,5
Caution:	Observe the hazard warnings!

Properties:

- Ready for use
- Removes algae and fungal growth

Applications:

- For the removal of algae and fungus from masonry, natural stone, facades and exterior surfaces.

Processing:

LOBA-Ex algae and fungus remover is ready for use. Depending on the amount of fungus or algae, LOBA-Ex can be diluted with water up to a maximum ratio of 1:1. This product is extremely corrosive. Other components, such as wood, plastics, glass, metals, garden soil, and layers of paint or varnish, etc., must be covered for protection. Metallic parts must be protected! When working with this product, protective clothing and protective goggles must be worn. Apply mechanically, using a soft nylon or perlon paintbrush. Apply directly to surfaces affected by algae or fungus. An effect should be seen after a short time. If necessary, repeat the application. After it has dried, the surface must be washed down thoroughly from the bottom to the top with clean, cold water. All tools and equipment must be washed thoroughly.

Yield:

Approximately 100 to 200 ml/m², depending on the type of application and the absorbency

Cleaning the tools and equipment and disposal of the water:

Clean tools and equipment with water immediately after use. Metallic parts must be protected! This product is extremely corrosive. The water used for cleaning must be collected in channels and disposed of. The applicable stipulations of the local authorities and the relevant environmental stipulations must be observed and complied with when disposing of the water.

Storage:

Store in the closed original container, in cool, frost-free conditions. Open the container carefully, since it may be under slight pressure. Close the container immediately after use.

Delivery form:

5-litre plastic container

Hazard notices and labelling:

Labelling in accordance with the EEC directive on hazardous substances:

Details regarding transport: Non-hazardous material

Water hazard class: 2 (self-assessment)

The information provided is based on extensive tests and practical experience. It does not apply to every application situation. For this reason we recommend that you carry out a trial if necessary. Subject to technical alterations within the framework of further development. Our general terms and conditions apply.
